

Premium AEROTEC for the first time at the Paris Air Show – Le Bourget 2009

Augsburg, 10 June, 2009 – The German aerostructures supplier Premium AEROTEC will be present at the Paris Air Show – Le Bourget (15 – 21 June, 2009) in Hall 1, booth E 197. Operative since January 2009, it is the company's first appearance in the year of the air show's 100th anniversary.

At the entrance of its stand, Premium AEROTEC demonstrates its abilities with the display of two carbon composites components for the new Airbus A350 XWB program: The first is a section 13/14 CFRP side shell test panel with a size of 3,50 meter x 2,30 meter, manufactured in prepreg-technology. Furthermore, the aft pressure bulkhead demonstrator manufactured in the VAP®-technology is displayed in its original size of 4,20 meter x 4,50 meter (VAP = Vacuum assisted process).

Premium AEROTEC's main business focus is design and manufacturing of titanium, aluminum and carbon fibre structures as well as the corresponding manufacturing systems for civil and military aircraft. Today, the company takes a leading position in the industry (no. 1 in Europe, no. 4 worldwide in aerostructures).

On its stand at the Paris Air Show, the company's engineering and manufacturing know-how will be shown in numerous examples.

**Public signing ceremony for Airbus A350 XWB work packages:
Monday, 15 June, 1 p.m., at the stand of Premium AEROTEC,
Hall 1, booth E 197**

Premium AEROTEC has more than 6,000 employees and expects to generate revenues of about one billion Euros for 2009. Premium AEROTEC's core business is the development and manufacturing of metal and carbon composite aerostructures and the corresponding production systems. The company has plants in Augsburg, Nordenham and Varel (Germany).
